ABOUT

I am a skilled front-end developer, specializing in HTML, CSS, and JavaScript. Excited to explore new technologies and expand my knowledge in web development.

PROJECTS

Weather App

Developed WeatherVista, a comprehensive weather application that provides real-time and accurate weather updates. Key features include:

- **Real-Time Forecasts:** Integrated with advanced weather data sources for up-to-the-minute updates.
- **Interactive Weather Maps:** Implemented dynamic radar and satellite imagery for detailed weather visualization.

Shoppify Clone

Developed a fully functional clone of Shoppify, an e-commerce platform, utilizing modern web technologies to replicate its core features and functionalities. Key aspects of the project include:

- **User Authentication:** Implemented secure user login, registration, and profile management systems.
- **Product Management:** Created dynamic product listings with filtering, searching, and sorting capabilities.

Google Clone

Developed a functional clone of Google's search engine, focusing on core search and user interface features. Key highlights of the project include:

- **Search Functionality:** Implemented a robust search engine using indexed data and algorithms to return relevant search results efficiently.
- **User Interface:** Designed a clean and intuitive interface, replicating Google's minimalist design with a focus on user experience and ease of navigation.
